INDEX.

Adie, Richard, Esq., Six's self-registering thermometer improved by, 84.

Africa, on the basin-like form of, by Sir R. I. Murchison, 52.

Agassiz, Professor Louis, on the classification of insects from embryological data, 101.

Anteater, Cape, account of, by W. T. Black, Esq., 168.

Arabs, freedom from leprosy, 188.

Arctic Natural History, 72.

Australia, on the condition and prospects of the Aborigines of, by W. Westgarth, 36.

Bailey, Professor J. W., on the microscopical soundings off the Atlantic Coast of the United States, 142.

Bennett, Mrs Anne Ramsden, on meteorological phenomena in connection with the climate of Berlin, 155, 214.

Bergmannite, pseudomorphous, an account of, by Professor J. R. Blum, 162.

Berzelius, Biography of, by Professor H. Rose, 1.

Black, W. T., assistant-surgeon, on the Anteater of the Cape, 168.

Blum, Professor J. R., on Gieseckite and Bergmannite, 162.

Buch, Leopold von, biographical notice of, 373.

Christison, Dr Alexander, on the climate of Rangoon, 179.

——— Dr Alexander, on a meteorological register kept at Rangoon, 377.

Chambers, Robert, Esq., on glacial phenomena in Scotland and parts of England, 229.

Clausius, R., Esq., on the colours of a jet of steam, and of the atmosphere, 166.

Climate of Berlin, observations on, 214.

Crawfurd, J. W., Esq., on the Negroes of the Indian Archipelago and Pacific Islands, 175.

XUM

Corbett, Richard, Esq., on an earthquake felt at Adderley, 180.
Crystallisation and Amorphism, 183.

Denham, Captain H., on deep-sea soundings, 346.
De la Rive, on the diurnal variations of the magnetic needle, 148.
———— on the influence of terrestrial magnetism on iron, 206.
Dinornis, bones and eggs of, 186.
Donarium identical with Thorium, 183.

Earthquake at Adderley, by Richard Corbett, Esq., 180.
Eggs, preservation of, 382.
Electricity applied to the capture of whales, 382.
Ellet, Charles, jun., on the application of reservoirs to the improvement of rivers, 118.

Faroe Islands, noticed, 380.
Fish, cod, of the Whale Fish Islands, 382.
Fishes, domestication of, 187.
Forbes, Professor Edward, on the geological distribution of marine animals, 311.

Gieseckite, pseudomorphous, described by Professor J. R. Blum, 162.
Glacial phenomena of Scotland, an account of, by R. Chambers, Esq., 229.
Glaciers, extent of, in the Polar Regions, 379.
Graphite, a large deposit of, in Glen Strath, Farer, Inverness-shire, and at St Johns, New Brunswick, 181.
Guano birds of the Lobos Islands, 381.

Henwood, John, Esq., on a remarkable deposit of tin ore at the Providence Mines, near St Ives, Cornwall, 68.
Hisinger, M. Wilhelm, obituary of, 188.
Horsford, Professor, on the solidification of the rocks of the Florida Reefs, and the sources of lime in the growth of corals, 56.
Horsford, Professor E. N., on the relation of the chemical constitution of bodies to light, 294.
———— on the effect of heat on the perpendicularity of Bunker Hill monument, 308.
Humboldt, Alexander von, remarks on lectures on science to the people, by, 110.

Insects, on the classification of, by Professor Louis Agassiz, 101.
Indigo, Dr Penny, on the valuation of, 285
Iron, native, 183.

James, Captain, R.E., meteorological observations by, 282.

Kjerulf, Theodor, on a variety of quartziferous trachyte, 367.

Leprosy, Arabs exempt from, 188.

Macgillivray, the late William, Regius Professor of Natural History, Aberdeen, biographical account of, 189.
Marchand, M. Eugene, on the analyses of snow and rain water, 179.
Metereological observations, 144.
Miller, John Fletcher, Esq., meteorological observations by, 46.
Minerals, paragenetic relations of, 323.
Murchison, Sir R. I., on the basin-like form of Africa, 52.

Nasmyth, James, Esq., some remarks by, on the probable present condition of the planets Jupiter and Saturn, in reference to temperature, 341.
Negroes of the Indian Archipelago, noticed by J. W. Crawfurd, 175.
Nostoc, remarks on, 383.

Obituary of Leopold von Buch, 369.
Oken, Professor, on popular assemblies for the advancement of science, 112.
Ordnance Survey, astronomical observations on, 350.

Patent law amendment act, 384.
Penny, Dr Frederick, on the valuation of indigo, 285.
Petermann, Augustus, Esq., on the distribution of animals available as food in the Arctic Regions, 295.
Platinum and Iridosmine in California, 182.

Rangoon, meteorological register of, 377.
Reservoirs, application of, to the improvement of rivers, 118.
Rocks, solidification of, in the Florida Reefs, and the sources of lime in the growth of corals, 56.
Rose, Professor H., his biography of Berzelius, 1.
Rowell, Mr G. A., on the change of temperature in Europe, and the variation of the magnetic needle, 312.

XUM

Scientific intelligence, 179, 379.
Scoresby, the Rev. Dr, on the Earl of Rosse's telescopes, 113.
Silem, Professor, on pseudomorphous minerals, 181.
Smith, Dr John Alexander, on animal remains found with Roman pottery, 122.
Soundings, microscopical, off the Atlantic Coast of the United States, by J. W. Bailey, 142.
Soundings, deep sea, in the Atlantic Ocean, by Captain Denham, 346.
Species, numerical list of, of animal kingdom, 380.
Steam, colours of a jet of, by R. Clausius, 166.
Stevenson, Thomas, Esq., on the gradual decrease of waters as they enter harbours, 378.
Stratification, Wells on the origin of, 291.
Strontiano-calcite, remarks on, 182.
Sulphur Mine in Upper Egypt noticed, 182.
Survey, Government geological, notes on the scales of, 362.

Tertiary formation, flora of, described, 183.
Tides, bed, and coasts of the North Sea or German Ocean, 185.
Tin ore, deposit of, at the Providence Mines, Cornwall, 68.
Thermometer, Six's self-registering, improved by Richard Adie, Esq., 84.
Thomson, Alexander, Esq., of Banchory, biographical account of the late Professor W. Macgillivray by, 189.
——— the late Dr Thomas, biography of, 86.
Trachyte, a quartziferous variety of, found in Iceland, described, 367.
Trevelyan, Sir Walter C. on the Faroe Islands, 380.

Vegetables, preservation of, noticed, 383.

Waves, Stevenson, T., Esq., on the reduction of the height of, 378.
Wells, D. A., Esq., on the origin of stratification,
Westgarth, W., Esq., on the conditions and prospects of the Aborigines of Australia, 36.
